

STEPS to run the Codevil Exam:

1. Download and install the Python 2.7 version here: <https://www.python.org/downloads/>

2. Extract sent zip file and open folder “Codevil Exam - JERIC BALANE”

Codevil Exam - JERIC BALANE			
Name	Date modified	Type	Size
 input_file	6/21/2015 4:43 PM	Text Document	1 KB
 README	6/21/2015 5:28 PM	Microsoft Office ...	130 KB
 run	5/27/2015 11:03 AM	Python File	1 KB

The only 3 files you’re going to touch:

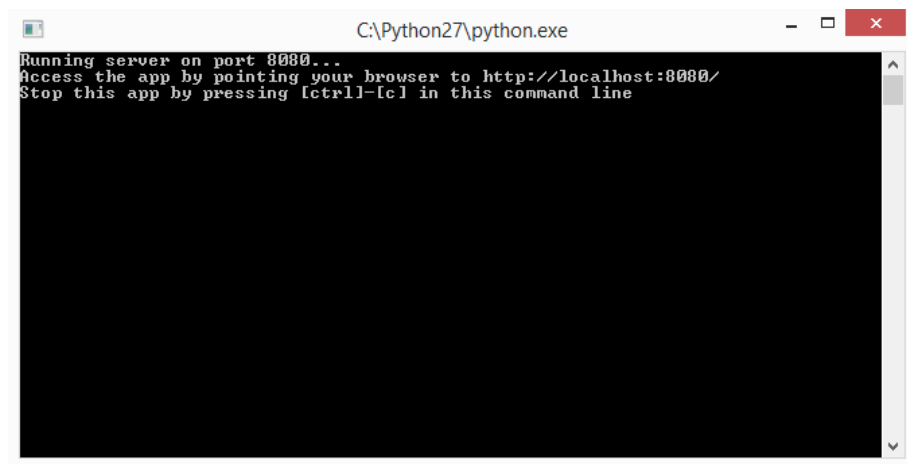

- Input\_file.txt – where your input text are.
- README.docx – you’re going to read it first before doing anything.
- run.py – I’ll discuss it later.

3. Open the README.docx
  - You're doing it right now.

4. Double-click on the file "run.py"

Codevil Exam - JERIC BALANE				
Name	Date modified	Type	Size	
input_file	6/21/2015 4:43 PM	Text Document	1 KB	
README	6/21/2015 5:28 PM	Microsoft Office ...	130 KB	
run	5/27/2015 11:03 AM	Python File	1 KB	

This should open afterward.

```
C:\Python27\python.exe
Running server on port 8080...
Access the app by pointing your browser to http://localhost:8080/
Stop this app by pressing [ctrl]+[c] in this command line
```

Leave it open, don't close it.

5. In your browser, open the URL: <http://localhost:8080/>

The results of the exam should appear here:

← → ↻ localhost:8080				
case 1 : 70 kg, m				
TIME	ENTERED	TOTAL	BAC	TIME LEFT
0	1.0	1.0	0.02521	01:00:00
1200	0.5	1.5	0.02941	01:10:00
